CYQUEO
Cyber-Security Solutions

Secure your transformation to the cloud: with Zscaler Cloud Security – Security as a Service

What used to be the corporate network is now the Internet. Conventional network infrastructure, in which the connection is only made via the headquarter, is replaced by direct internet access.

The end of classic security appliances at every location

Uniform and immediate protection for every Internet access (any device, any user, any location) is the key for secured workplaces in a fully digitalized working environment.

With over 100 data centers around the world, Zscaler is not only revolutionizing Cloud Security – today it is the world's largest cloud security network.

Zscaler helps enterprises move securely to the cloud.

Zscaler secures both: your internet traffic and your applications in the cloud. Zscaler Internet Access (ZIA) is a Secure Internet and Web Gateway delivered from the Cloud. Zscaler Private Access (ZPA) secures your users' access to specific internal applications.

For detailed questions and support around Zscaler, please send us an email:
