# Managed Service ZIA

Zscaler uses the largest security cloud on the planet. We support you in the implementation of over 1,000 successfully implemented projects.

## How is the Zscaler Internet Access optimized?

Zscaler provides real-time security for the web traffic of your devices and users, including roaming clients and IoT devices. Your company benefits from this security—however, to fully leverage the potential of Zscaler Internet Access, we optimize your protection to the maximum with our expertise. Our team of experienced and specialized Zscaler technicians ensures this.

The CYQUEO team brings extensive expertise in the implementation and maintenance of Zscaler Cloud Security. For this reason, we have made the CYQUEO experience accessible to you. We offer three options to test the implementation and optimization of **Zscaler Internet Access (ZIA)** in your organization. Our Managed Service ensures that your team, regardless of location, is optimally configured to connect with Zscaler's global cloud data centers, allowing us to support you anytime, anywhere.

---

## What makes the CYQUEO experience exceptional?

CYQUEO, your partner for ZIA

### Health-Check

Have you successfully implemented **Zscaler Internet Access**? We offer you a comprehensive review. Our health check, based on the CYQUEO experience, includes review of the Zscaler environment with regard to its configuration recommendations for improvement according to the traffic light principle review of the rules and regulations.

Our **managed service** ensures that your team is securely positioned with Zscaler cloud data centers around the world, regardless of location. So we can support you no matter where you are.

If you also use other CYQUEO solutions in addition to Zscaler, our hourly billing service is the ideal choice. This service is tailored to your individual requirements and offers you comprehensive expertise. Our highly qualified and certified Zscaler experts take full control of the installation and management of your Zscaler Internet Access solution to ensure smooth operation. The Managed Service is the most comprehensive CYQUEO experience. If you want our certified Zscaler engineers to take over the installation of Zscaler Internet Access, this is the optimal solution for you. We take care of all aspects and guarantee an optimal implementation.
